### ● SUMMARY

I am a postdoctoral researcher at the Bern University of Applied Sciences (BFH) Business School, and was previously a researcher at the World Intellectual Property Organization (WIPO) of the United Nations. I received my PhD in Economics from the University of Neuchâtel in 2023. My research focuses on the economics of intellectual property, innovation, digitization, sustainability and the creative industries. The goal of my work is to provide solid empirical evidence that supports current policy discussions. To do this, I invest considerable time and creativity in developing new datasets and conducting rigorous econometric analyses.
